Definition of Done

A clear, concise list of requirements that our software adheres to that defines ANY story to be considered done

Technical Tasks:

- Project builds without warnings

- Mockups for any new features reviewed and decided on

- Peer Code Review performed, all bugs fixed

- Code compiled, doesn't break anything when pushed

- Code checked into the appropriate local or origin branch for viewing

- Code is sufficiently commented to understand what functions are responsible for what

- Documentation Updated accordingly if the architecture is changed

- Build pushed to the server for viewing for other team members
